Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

*Proposals Due: July 28, 2017 @ 3:00 PM EST*

## MVA Debuts Electronic School Bus Inspection System

The Maryland Motor Vehicle Administration has installed a new electronic system of reporting school bus inspections, replacing its old, paper-based system, the agency announced Thursday. [Read more at baltimoresub.com.](#)

## Fines For Driving Without Insurance Identification Begin (Maryland)

Heads up Maryland drivers! Fines enforcing a new law start this month. The law requires drivers to carry a current insurance identification card, or he/she will face a \$50 fine. The card must be in a tangible or electronic format. [Read more at localdvm.com.](#)

## DMV Cracks Down On Toll Evaders By Suspending Registrations (New York)

Pay that toll — or else! The state Department of Motor Vehicles has suspended the vehicle registrations of more than 4,900 motorists who crossed New York bridges and tunnels without paying tolls, officials told The Post. [Read more at nypost.com.](#)

## PennDOT Secretary Leslie Richards Named First Female PA Turnpike Chair

PennDOT Secretary Leslie S. Richards of Whitemarsh Township was named chair of the Pennsylvania Turnpike Commission as part of a reorganization commissioners approved today during a bimonthly meeting of the five-member panel. [Read more at theprogressnews.com.](#)

## DMV Facial Recognition System Deemed Illegal By Vermont Attorney General

A facial recognition system in place at Vermont's Department of Motor Vehicle has been suspended indefinitely after a review by the state's Attorney General found that the system violates state law. The finding by Attorney General TJ Donovan's office confirms what the Vermont chapter of the American Civil Liberties Union said in May when the group called for a stop to the program: A state law passed in 2004 explicitly prohibits the DMV from using biometrics. [Read more at digital.vpr.net.](#)

## REGION II NEWS

## Alabama To Allow Digital Version Of Vehicle Registration During Traffic Stops

Traffic stops may get easier and more efficient for Alabamians starting very soon. On Aug. 1 drivers will be able to offer officers a digital version of their vehicle registration. [Read more at wsfa.com.](#)

## Human Trafficking Prevention Course Required For Arkansas CDL Holders

A new law will require truck drivers who are applying for or renewing a Class A commercial driver's license in Arkansas to complete a human trafficking prevention course. The law goes into effect on July 31. [Read more at landlinemag.com.](#)

## Better Call Behnken: Owner Of Tampa Car Dealership Accused Of Rolling Back Odometers Arrested (Florida)

The owner of a Tampa car dealership faces 42 felony charges, accused of funneling cars through her company, then rolling back odometers and flipping the vehicles to unsuspecting buyers on Craig's List. [View the article at wfla.com.](#)

## State Driver Services Reminds Motorists Of Georgia SUPER SPEEDER Laws

In case you haven't heard, this entire week, the Georgia Governor's Office of

Highway Safety (GOHS) and law enforcement agencies throughout the State of Georgia are teaming up with their counterparts in Alabama, Florida, South Carolina, and Tennessee in "Operation Southern Shield", a week-long speed prevention and enforcement initiative in each of their respective states on interstates, major highways and local roads. [View the press release for more.](#)

### **Lawmaker Hopes Vertical Driver's License Reduces Underage Alcohol Sales, But Will It? (Tennessee)**

Nearly everyone, it seems, supports the concept of a vertically-oriented driver's license to help alcohol sellers quickly identify an underage person. But does the idea actually work? [Read more at knoxnews.com.](#)

### **Texas Slams The Brakes On A Major Odometer Fraud Operation**

A man suspected of rolling back the odometers on hundreds of vehicles to defraud innocent Texas consumers was arrested following a three-year investigation by the Texas Department of Motor Vehicles (TxDMV), the Texas Department of Public Safety (DPS), the Fort Worth Police Department, the Grand Prairie Police Department, the Tarrant County Regional Auto Crimes Task Force and the Tarrant County District Attorney's Office. [View the press release.](#)

## **REGION III NEWS**

### **Robot Cars Hits Speed Bump In Illinois**

The push to allow testing of autonomous vehicles on Illinois roads has stalled for now, but the sponsor of the measure hopes to rev up talks again soon. State Rep. Mike Zalewski, D-Riverside, said one speed bump that is slowing down the bill is liability. [Read more at altondailynews.com.](#)

### **SOS Suspends Licenses Of Pontiac And Waterford Auto Dealers (Michigan)**

Secretary of State Ruth Johnson announced today that the license of three used vehicle dealers in Pontiac and Waterford have been summarily suspended for failure to follow proper procedures as required by law. [Read the press release.](#)

### **MDOT Video Reminds Drivers Of Their Role In Reducing Fatalities (Michigan)**

Driver behavior is a contributing factor in at least 90 percent of all fatal traffic crashes and the Michigan Department of Transportation (MDOT) is reminding motorists of the critical role they play in traffic safety. [Read more and access the video at content.govdelivery.com.](#)

## **REGION IV NEWS**

### **AZDPS Receives \$600,000 To Improve Computerized Dispatch (Arizona)**

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [View the press release.](#)

### **Caltrans Begins Modifying Roads For Self-Driving Cars (California)**

In yet another sign of the rapid advance of self-driving technology, California has already started adapting roads for autonomous vehicles, a new report says. [Read more at siliconbeat.com.](#)

## **California Legislature Advances New CDL Training Requirements**

A bill nearing completion in the California Legislature is intended to improve safety on the state's roadways by implementing new federal commercial driver regulations. Additional truck driver safety requirements would also be added. [Read more at landlinemag.com.](#)

## **California Could Be In Line for Gender-Neutral Identification**

California lawmakers are considering a proposal to provide gender-neutral identification. State Sen. Toni Atkins (D - 39th District) introduced a bill to streamline the process of providing a gender neutral or nonbinary option on the California driver license, birth certificate and other forms of state identification. [Read more at nbclosangeles.com.](#)

## **Self-Driving Car Arrives In Seattle After 2,500-mile Autonomous Cross-Country Trip (Washington)**

Washington Gov. Jay Inslee is already seeing results of his new executive order that encourages self-driving technology testing. [Read more at geekwire.com.](#)

## **State Patrol: Driver Had 54 Times The Legal Limit For Marijuana Intoxication (Washington)**

Results from a blood test on a driver arrested in May by the Washington State Patrol show he had 54 times the legal limit for marijuana's most active ingredient in his bloodstream - the highest level recorded in Washington state in at least eight years. [Read more at komonews.com.](#)

## **OTHER NEWS**

## **Should Gender Be Removed From Identification Documents?**

A campaign has been launched to get rid of gender distinctions from government ID documents. A baby born in Canada may be the movement's first success story. [Read the article at Healthline.com.](#)

## **Instead Of Hacking Self-Driving Cars, Researchers Are Trying To Hack The World They See**

A self-driving car is theoretically able to replace a human driver because it can see and react the way a human would—or better. But AI researchers are now debating whether their software could be susceptible to "hacks" of real-world objects like stop signs, invisible to the human eye but seen by machines. [Read more at qz.com.](#)

## **U.S. House Panel Approves Broad Proposal On Self-Driving Cars**

A U.S. House panel on Wednesday approved a sweeping proposal by voice vote to allow automakers to deploy up to 100,000 self-driving vehicles without meeting existing auto safety standards and bar states from imposing driverless car rules. Representative Robert Latta, a Republican who heads the Energy and Commerce Committee subcommittee overseeing consumer protection, said he would continue to consider changes before the full committee votes on the measure, expected next week. [Read more at reuters.com.](#)

## **With New Takata Air Bag Recalls, Automakers May Face More Liabilities**

Takata Corp's bankruptcy filing last month was meant to draw a line under the auto industry's biggest safety recall, but last week's announcement of more air bag inflator recalls suggests automakers could face fresh liabilities in the future. [Read](#)

[more at reuters.com.](#)

## **Cop Unlocks Key To Identifying Criminal Aliens Using Stolen Identities**

Police Officer James Scott of Saugus, Massachusetts, is an expert in impostor detection, and he has developed a training program for law enforcement officers that equips them with the knowledge and skills necessary to identify suspects who are in the country illegally. [Read more at lifezette.com.](#)

## **GAO Urges Commercial Motor Agency To Re-Strategize Its IT Modernization**

The Federal Motor Carrier Safety Administration needs to go back to the drawing board to better plan the modernization its IT systems, says a new report by the Government Accountability Office. [Read more at fedcoop.com.](#)

*Proposals Due: July 28, 2017 @ 3:00 PM EST*

## MVA Debuts Electronic School Bus Inspection System

The Maryland Motor Vehicle Administration has installed a new electronic system of reporting school bus inspections, replacing its old, paper-based system, the agency announced Thursday. [Read more at baltimoresub.com.](#)

## Fines For Driving Without Insurance Identification Begin (Maryland)

Heads up Maryland drivers! Fines enforcing a new law start this month. The law requires drivers to carry a current insurance identification card, or he/she will face a \$50 fine. The card must be in a tangible or electronic format. [Read more at localdvm.com.](#)

## DMV Cracks Down On Toll Evaders By Suspending Registrations (New York)

Pay that toll — or else! The state Department of Motor Vehicles has suspended the vehicle registrations of more than 4,900 motorists who crossed New York bridges and tunnels without paying tolls, officials told The Post. [Read more at nypost.com.](#)

## PennDOT Secretary Leslie Richards Named First Female PA Turnpike Chair

PennDOT Secretary Leslie S. Richards of Whitemarsh Township was named chair of the Pennsylvania Turnpike Commission as part of a reorganization commissioners approved today during a bimonthly meeting of the five-member panel. [Read more at theprogressnews.com.](#)

## DMV Facial Recognition System Deemed Illegal By Vermont Attorney General

A facial recognition system in place at Vermont's Department of Motor Vehicle has been suspended indefinitely after a review by the state's Attorney General found that the system violates state law. The finding by Attorney General TJ Donovan's office confirms what the Vermont chapter of the American Civil Liberties Union said in May when the group called for a stop to the program: A state law passed in 2004 explicitly prohibits the DMV from using biometrics. [Read more at digital.vpr.net.](#)

## REGION II NEWS

## Alabama To Allow Digital Version Of Vehicle Registration During Traffic Stops

Traffic stops may get easier and more efficient for Alabamians starting very soon. On Aug. 1 drivers will be able to offer officers a digital version of their vehicle registration. [Read more at wsfa.com.](#)

## Human Trafficking Prevention Course Required For Arkansas CDL Holders

A new law will require truck drivers who are applying for or renewing a Class A commercial driver's license in Arkansas to complete a human trafficking prevention course. The law goes into effect on July 31. [Read more at landlinemag.com.](#)

## Better Call Behnken: Owner Of Tampa Car Dealership Accused Of Rolling Back Odometers Arrested (Florida)

The owner of a Tampa car dealership faces 42 felony charges, accused of funneling cars through her company, then rolling back odometers and flipping the vehicles to unsuspecting buyers on Craig's List. [View the article at wfla.com.](#)

## State Driver Services Reminds Motorists Of Georgia SUPER SPEEDER Laws

In case you haven't heard, this entire week, the Georgia Governor's Office of

Highway Safety (GOHS) and law enforcement agencies throughout the State of Georgia are teaming up with their counterparts in Alabama, Florida, South Carolina, and Tennessee in "Operation Southern Shield", a week-long speed prevention and enforcement initiative in each of their respective states on interstates, major highways and local roads. [View the press release for more.](#)

### **Lawmaker Hopes Vertical Driver's License Reduces Underage Alcohol Sales, But Will It? (Tennessee)**

Nearly everyone, it seems, supports the concept of a vertically-oriented driver's license to help alcohol sellers quickly identify an underage person. But does the idea actually work? [Read more at knoxnews.com.](#)

### **Texas Slams The Brakes On A Major Odometer Fraud Operation**

A man suspected of rolling back the odometers on hundreds of vehicles to defraud innocent Texas consumers was arrested following a three-year investigation by the Texas Department of Motor Vehicles (TxDMV), the Texas Department of Public Safety (DPS), the Fort Worth Police Department, the Grand Prairie Police Department, the Tarrant County Regional Auto Crimes Task Force and the Tarrant County District Attorney's Office. [View the press release.](#)

## **REGION III NEWS**

### **Robot Cars Hits Speed Bump In Illinois**

The push to allow testing of autonomous vehicles on Illinois roads has stalled for now, but the sponsor of the measure hopes to rev up talks again soon. State Rep. Mike Zalewski, D-Riverside, said one speed bump that is slowing down the bill is liability. [Read more at altondailynews.com.](#)

### **SOS Suspends Licenses Of Pontiac And Waterford Auto Dealers (Michigan)**

Secretary of State Ruth Johnson announced today that the license of three used vehicle dealers in Pontiac and Waterford have been summarily suspended for failure to follow proper procedures as required by law. [Read the press release.](#)

### **MDOT Video Reminds Drivers Of Their Role In Reducing Fatalities (Michigan)**

Driver behavior is a contributing factor in at least 90 percent of all fatal traffic crashes and the Michigan Department of Transportation (MDOT) is reminding motorists of the critical role they play in traffic safety. [Read more and access the video at content.govdelivery.com.](#)

## **REGION IV NEWS**

### **AZDPS Receives \$600,000 To Improve Computerized Dispatch (Arizona)**

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [View the press release.](#)

### **Caltrans Begins Modifying Roads For Self-Driving Cars (California)**

In yet another sign of the rapid advance of self-driving technology, California has already started adapting roads for autonomous vehicles, a new report says. [Read more at siliconbeat.com.](#)

## California Legislature Advances New CDL Training Requirements

A bill nearing completion in the California Legislature is intended to improve safety on the state's roadways by implementing new federal commercial driver regulations. Additional truck driver safety requirements would also be added. [Read more at landlinemag.com.](#)

## California Could Be In Line for Gender-Neutral Identification

California lawmakers are considering a proposal to provide gender-neutral identification. State Sen. Toni Atkins (D - 39th District) introduced a bill to streamline the process of providing a gender neutral or nonbinary option on the California driver license, birth certificate and other forms of state identification. [Read more at nbclosangeles.com.](#)

## Self-Driving Car Arrives In Seattle After 2,500-mile Autonomous Cross-Country Trip (Washington)

Washington Gov. Jay Inslee is already seeing results of his new executive order that encourages self-driving technology testing. [Read more at geekwire.com.](#)

## State Patrol: Driver Had 54 Times The Legal Limit For Marijuana Intoxication (Washington)

Results from a blood test on a driver arrested in May by the Washington State Patrol show he had 54 times the legal limit for marijuana's most active ingredient in his bloodstream - the highest level recorded in Washington state in at least eight years. [Read more at komonews.com.](#)

## OTHER NEWS

## Should Gender Be Removed From Identification Documents?

A campaign has been launched to get rid of gender distinctions from government ID documents. A baby born in Canada may be the movement's first success story. [Read the article at Healthline.com.](#)

## Instead Of Hacking Self-Driving Cars, Researchers Are Trying To Hack The World They See

A self-driving car is theoretically able to replace a human driver because it can see and react the way a human would—or better. But AI researchers are now debating whether their software could be susceptible to "hacks" of real-world objects like stop signs, invisible to the human eye but seen by machines. [Read more at qz.com.](#)

## U.S. House Panel Approves Broad Proposal On Self-Driving Cars

A U.S. House panel on Wednesday approved a sweeping proposal by voice vote to allow automakers to deploy up to 100,000 self-driving vehicles without meeting existing auto safety standards and bar states from imposing driverless car rules. Representative Robert Latta, a Republican who heads the Energy and Commerce Committee subcommittee overseeing consumer protection, said he would continue to consider changes before the full committee votes on the measure, expected next week. [Read more at reuters.com.](#)

## With New Takata Air Bag Recalls, Automakers May Face More Liabilities

Takata Corp's bankruptcy filing last month was meant to draw a line under the auto industry's biggest safety recall, but last week's announcement of more air bag inflator recalls suggests automakers could face fresh liabilities in the future. [Read](#)

[more at reuters.com.](#)

## Cop Unlocks Key To Identifying Criminal Aliens Using Stolen Identities

Police Officer James Scott of Saugus, Massachusetts, is an expert in impostor detection, and he has developed a training program for law enforcement officers that equips them with the knowledge and skills necessary to identify suspects who are in the country illegally. [Read more at lifezette.com.](#)

## GAO Urges Commercial Motor Agency To Re-Strategize Its IT Modernization

The Federal Motor Carrier Safety Administration needs to go back to the drawing board to better plan the modernization its IT systems, says a new report by the Government Accountability Office. [Read more at fedcoop.com.](#)

*Proposals Due: July 28, 2017 @ 3:00 PM EST*

## MVA Debuts Electronic School Bus Inspection System

The Maryland Motor Vehicle Administration has installed a new electronic system of reporting school bus inspections, replacing its old, paper-based system, the agency announced Thursday. [Read more at baltimoresub.com.](#)

## Fines For Driving Without Insurance Identification Begin (Maryland)

Heads up Maryland drivers! Fines enforcing a new law start this month. The law requires drivers to carry a current insurance identification card, or he/she will face a \$50 fine. The card must be in a tangible or electronic format. [Read more at localdvm.com.](#)

## DMV Cracks Down On Toll Evaders By Suspending Registrations (New York)

Pay that toll — or else! The state Department of Motor Vehicles has suspended the vehicle registrations of more than 4,900 motorists who crossed New York bridges and tunnels without paying tolls, officials told The Post. [Read more at nypost.com.](#)

## PennDOT Secretary Leslie Richards Named First Female PA Turnpike Chair

PennDOT Secretary Leslie S. Richards of Whitemarsh Township was named chair of the Pennsylvania Turnpike Commission as part of a reorganization commissioners approved today during a bimonthly meeting of the five-member panel. [Read more at theprogressnews.com.](#)

## DMV Facial Recognition System Deemed Illegal By Vermont Attorney General

A facial recognition system in place at Vermont's Department of Motor Vehicle has been suspended indefinitely after a review by the state's Attorney General found that the system violates state law. The finding by Attorney General TJ Donovan's office confirms what the Vermont chapter of the American Civil Liberties Union said in May when the group called for a stop to the program: A state law passed in 2004 explicitly prohibits the DMV from using biometrics. [Read more at digital.vpr.net.](#)

## REGION II NEWS

## Alabama To Allow Digital Version Of Vehicle Registration During Traffic Stops

Traffic stops may get easier and more efficient for Alabamians starting very soon. On Aug. 1 drivers will be able to offer officers a digital version of their vehicle registration. [Read more at wsfa.com.](#)

## Human Trafficking Prevention Course Required For Arkansas CDL Holders

A new law will require truck drivers who are applying for or renewing a Class A commercial driver's license in Arkansas to complete a human trafficking prevention course. The law goes into effect on July 31. [Read more at landlinemag.com.](#)

## Better Call Behnken: Owner Of Tampa Car Dealership Accused Of Rolling Back Odometers Arrested (Florida)

The owner of a Tampa car dealership faces 42 felony charges, accused of funneling cars through her company, then rolling back odometers and flipping the vehicles to unsuspecting buyers on Craig's List. [View the article at wfla.com.](#)

## State Driver Services Reminds Motorists Of Georgia SUPER SPEEDER Laws

In case you haven't heard, this entire week, the Georgia Governor's Office of

Highway Safety (GOHS) and law enforcement agencies throughout the State of Georgia are teaming up with their counterparts in Alabama, Florida, South Carolina, and Tennessee in "Operation Southern Shield", a week-long speed prevention and enforcement initiative in each of their respective states on interstates, major highways and local roads. [View the press release for more.](#)

### **Lawmaker Hopes Vertical Driver's License Reduces Underage Alcohol Sales, But Will It? (Tennessee)**

Nearly everyone, it seems, supports the concept of a vertically-oriented driver's license to help alcohol sellers quickly identify an underage person. But does the idea actually work? [Read more at knoxnews.com.](#)

### **Texas Slams The Brakes On A Major Odometer Fraud Operation**

A man suspected of rolling back the odometers on hundreds of vehicles to defraud innocent Texas consumers was arrested following a three-year investigation by the Texas Department of Motor Vehicles (TxDMV), the Texas Department of Public Safety (DPS), the Fort Worth Police Department, the Grand Prairie Police Department, the Tarrant County Regional Auto Crimes Task Force and the Tarrant County District Attorney's Office. [View the press release.](#)

## **REGION III NEWS**

### **Robot Cars Hits Speed Bump In Illinois**

The push to allow testing of autonomous vehicles on Illinois roads has stalled for now, but the sponsor of the measure hopes to rev up talks again soon. State Rep. Mike Zalewski, D-Riverside, said one speed bump that is slowing down the bill is liability. [Read more at altondailynews.com.](#)

### **SOS Suspends Licenses Of Pontiac And Waterford Auto Dealers (Michigan)**

Secretary of State Ruth Johnson announced today that the license of three used vehicle dealers in Pontiac and Waterford have been summarily suspended for failure to follow proper procedures as required by law. [Read the press release.](#)

### **MDOT Video Reminds Drivers Of Their Role In Reducing Fatalities (Michigan)**

Driver behavior is a contributing factor in at least 90 percent of all fatal traffic crashes and the Michigan Department of Transportation (MDOT) is reminding motorists of the critical role they play in traffic safety. [Read more and access the video at content.govdelivery.com.](#)

## **REGION IV NEWS**

### **AZDPS Receives \$600,000 To Improve Computerized Dispatch (Arizona)**

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [View the press release.](#)

### **Caltrans Begins Modifying Roads For Self-Driving Cars (California)**

In yet another sign of the rapid advance of self-driving technology, California has already started adapting roads for autonomous vehicles, a new report says. [Read more at siliconbeat.com.](#)

## California Legislature Advances New CDL Training Requirements

A bill nearing completion in the California Legislature is intended to improve safety on the state's roadways by implementing new federal commercial driver regulations. Additional truck driver safety requirements would also be added. [Read more at landlinemag.com.](#)

## California Could Be In Line for Gender-Neutral Identification

California lawmakers are considering a proposal to provide gender-neutral identification. State Sen. Toni Atkins (D - 39th District) introduced a bill to streamline the process of providing a gender neutral or nonbinary option on the California driver license, birth certificate and other forms of state identification. [Read more at nbclosangeles.com.](#)

## Self-Driving Car Arrives In Seattle After 2,500-mile Autonomous Cross-Country Trip (Washington)

Washington Gov. Jay Inslee is already seeing results of his new executive order that encourages self-driving technology testing. [Read more at geekwire.com.](#)

## State Patrol: Driver Had 54 Times The Legal Limit For Marijuana Intoxication (Washington)

Results from a blood test on a driver arrested in May by the Washington State Patrol show he had 54 times the legal limit for marijuana's most active ingredient in his bloodstream - the highest level recorded in Washington state in at least eight years. [Read more at komonews.com.](#)

## OTHER NEWS

## Should Gender Be Removed From Identification Documents?

A campaign has been launched to get rid of gender distinctions from government ID documents. A baby born in Canada may be the movement's first success story. [Read the article at Healthline.com.](#)

## Instead Of Hacking Self-Driving Cars, Researchers Are Trying To Hack The World They See

A self-driving car is theoretically able to replace a human driver because it can see and react the way a human would—or better. But AI researchers are now debating whether their software could be susceptible to "hacks" of real-world objects like stop signs, invisible to the human eye but seen by machines. [Read more at qz.com.](#)

## U.S. House Panel Approves Broad Proposal On Self-Driving Cars

A U.S. House panel on Wednesday approved a sweeping proposal by voice vote to allow automakers to deploy up to 100,000 self-driving vehicles without meeting existing auto safety standards and bar states from imposing driverless car rules. Representative Robert Latta, a Republican who heads the Energy and Commerce Committee subcommittee overseeing consumer protection, said he would continue to consider changes before the full committee votes on the measure, expected next week. [Read more at reuters.com.](#)

## With New Takata Air Bag Recalls, Automakers May Face More Liabilities

Takata Corp's bankruptcy filing last month was meant to draw a line under the auto industry's biggest safety recall, but last week's announcement of more air bag inflator recalls suggests automakers could face fresh liabilities in the future. [Read](#)

[more at reuters.com.](#)

## **Cop Unlocks Key To Identifying Criminal Aliens Using Stolen Identities**

Police Officer James Scott of Saugus, Massachusetts, is an expert in impostor detection, and he has developed a training program for law enforcement officers that equips them with the knowledge and skills necessary to identify suspects who are in the country illegally. [Read more at lifezette.com.](#)

## **GAO Urges Commercial Motor Agency To Re-Strategize Its IT Modernization**

The Federal Motor Carrier Safety Administration needs to go back to the drawing board to better plan the modernization its IT systems, says a new report by the Government Accountability Office. [Read more at fedcoop.com.](#)

*Proposals Due: July 28, 2017 @ 3:00 PM EST*

## MVA Debuts Electronic School Bus Inspection System

The Maryland Motor Vehicle Administration has installed a new electronic system of reporting school bus inspections, replacing its old, paper-based system, the agency announced Thursday. [Read more at baltimoresub.com.](#)

## Fines For Driving Without Insurance Identification Begin (Maryland)

Heads up Maryland drivers! Fines enforcing a new law start this month. The law requires drivers to carry a current insurance identification card, or he/she will face a \$50 fine. The card must be in a tangible or electronic format. [Read more at localdvm.com.](#)

## DMV Cracks Down On Toll Evaders By Suspending Registrations (New York)

Pay that toll — or else! The state Department of Motor Vehicles has suspended the vehicle registrations of more than 4,900 motorists who crossed New York bridges and tunnels without paying tolls, officials told The Post. [Read more at nypost.com.](#)

## PennDOT Secretary Leslie Richards Named First Female PA Turnpike Chair

PennDOT Secretary Leslie S. Richards of Whitemarsh Township was named chair of the Pennsylvania Turnpike Commission as part of a reorganization commissioners approved today during a bimonthly meeting of the five-member panel. [Read more at theprogressnews.com.](#)

## DMV Facial Recognition System Deemed Illegal By Vermont Attorney General

A facial recognition system in place at Vermont's Department of Motor Vehicle has been suspended indefinitely after a review by the state's Attorney General found that the system violates state law. The finding by Attorney General TJ Donovan's office confirms what the Vermont chapter of the American Civil Liberties Union said in May when the group called for a stop to the program: A state law passed in 2004 explicitly prohibits the DMV from using biometrics. [Read more at digital.vpr.net.](#)

## REGION II NEWS

## Alabama To Allow Digital Version Of Vehicle Registration During Traffic Stops

Traffic stops may get easier and more efficient for Alabamians starting very soon. On Aug. 1 drivers will be able to offer officers a digital version of their vehicle registration. [Read more at wsfa.com.](#)

## Human Trafficking Prevention Course Required For Arkansas CDL Holders

A new law will require truck drivers who are applying for or renewing a Class A commercial driver's license in Arkansas to complete a human trafficking prevention course. The law goes into effect on July 31. [Read more at landlinemag.com.](#)

## Better Call Behnken: Owner Of Tampa Car Dealership Accused Of Rolling Back Odometers Arrested (Florida)

The owner of a Tampa car dealership faces 42 felony charges, accused of funneling cars through her company, then rolling back odometers and flipping the vehicles to unsuspecting buyers on Craig's List. [View the article at wfla.com.](#)

## State Driver Services Reminds Motorists Of Georgia SUPER SPEEDER Laws

In case you haven't heard, this entire week, the Georgia Governor's Office of

Highway Safety (GOHS) and law enforcement agencies throughout the State of Georgia are teaming up with their counterparts in Alabama, Florida, South Carolina, and Tennessee in "Operation Southern Shield", a week-long speed prevention and enforcement initiative in each of their respective states on interstates, major highways and local roads. [View the press release for more.](#)

### **Lawmaker Hopes Vertical Driver's License Reduces Underage Alcohol Sales, But Will It? (Tennessee)**

Nearly everyone, it seems, supports the concept of a vertically-oriented driver's license to help alcohol sellers quickly identify an underage person. But does the idea actually work? [Read more at knoxnews.com.](#)

### **Texas Slams The Brakes On A Major Odometer Fraud Operation**

A man suspected of rolling back the odometers on hundreds of vehicles to defraud innocent Texas consumers was arrested following a three-year investigation by the Texas Department of Motor Vehicles (TxDMV), the Texas Department of Public Safety (DPS), the Fort Worth Police Department, the Grand Prairie Police Department, the Tarrant County Regional Auto Crimes Task Force and the Tarrant County District Attorney's Office. [View the press release.](#)

## **REGION III NEWS**

### **Robot Cars Hits Speed Bump In Illinois**

The push to allow testing of autonomous vehicles on Illinois roads has stalled for now, but the sponsor of the measure hopes to rev up talks again soon. State Rep. Mike Zalewski, D-Riverside, said one speed bump that is slowing down the bill is liability. [Read more at altondailynews.com.](#)

### **SOS Suspends Licenses Of Pontiac And Waterford Auto Dealers (Michigan)**

Secretary of State Ruth Johnson announced today that the license of three used vehicle dealers in Pontiac and Waterford have been summarily suspended for failure to follow proper procedures as required by law. [Read the press release.](#)

### **MDOT Video Reminds Drivers Of Their Role In Reducing Fatalities (Michigan)**

Driver behavior is a contributing factor in at least 90 percent of all fatal traffic crashes and the Michigan Department of Transportation (MDOT) is reminding motorists of the critical role they play in traffic safety. [Read more and access the video at content.govdelivery.com.](#)

## **REGION IV NEWS**

### **AZDPS Receives \$600,000 To Improve Computerized Dispatch (Arizona)**

Computer aided dispatch (CAD) is the virtual life-line for law enforcement officers at the hands of dispatchers. Thanks to the Governor's Office of Highway Safety (GOHS), the Arizona Department of Public Safety will be able to replace its aging CAD system with new, Spillman state of the art technology, enabling the agency to interface with other state agencies, specifically the Arizona Department of Transportation (ADOT). [View the press release.](#)

### **Caltrans Begins Modifying Roads For Self-Driving Cars (California)**

In yet another sign of the rapid advance of self-driving technology, California has already started adapting roads for autonomous vehicles, a new report says. [Read more at siliconbeat.com.](#)

## **California Legislature Advances New CDL Training Requirements**

A bill nearing completion in the California Legislature is intended to improve safety on the state's roadways by implementing new federal commercial driver regulations. Additional truck driver safety requirements would also be added. [Read more at landlinemag.com.](#)

## **California Could Be In Line for Gender-Neutral Identification**

California lawmakers are considering a proposal to provide gender-neutral identification. State Sen. Toni Atkins (D - 39th District) introduced a bill to streamline the process of providing a gender neutral or nonbinary option on the California driver license, birth certificate and other forms of state identification. [Read more at nbclosangeles.com.](#)

## **Self-Driving Car Arrives In Seattle After 2,500-mile Autonomous Cross-Country Trip (Washington)**

Washington Gov. Jay Inslee is already seeing results of his new executive order that encourages self-driving technology testing. [Read more at geekwire.com.](#)

## **State Patrol: Driver Had 54 Times The Legal Limit For Marijuana Intoxication (Washington)**

Results from a blood test on a driver arrested in May by the Washington State Patrol show he had 54 times the legal limit for marijuana's most active ingredient in his bloodstream - the highest level recorded in Washington state in at least eight years. [Read more at komonews.com.](#)

## **OTHER NEWS**

## **Should Gender Be Removed From Identification Documents?**

A campaign has been launched to get rid of gender distinctions from government ID documents. A baby born in Canada may be the movement's first success story. [Read the article at Healthline.com.](#)

## **Instead Of Hacking Self-Driving Cars, Researchers Are Trying To Hack The World They See**

A self-driving car is theoretically able to replace a human driver because it can see and react the way a human would—or better. But AI researchers are now debating whether their software could be susceptible to "hacks" of real-world objects like stop signs, invisible to the human eye but seen by machines. [Read more at qz.com.](#)

## **U.S. House Panel Approves Broad Proposal On Self-Driving Cars**

A U.S. House panel on Wednesday approved a sweeping proposal by voice vote to allow automakers to deploy up to 100,000 self-driving vehicles without meeting existing auto safety standards and bar states from imposing driverless car rules. Representative Robert Latta, a Republican who heads the Energy and Commerce Committee subcommittee overseeing consumer protection, said he would continue to consider changes before the full committee votes on the measure, expected next week. [Read more at reuters.com.](#)

## **With New Takata Air Bag Recalls, Automakers May Face More Liabilities**

Takata Corp's bankruptcy filing last month was meant to draw a line under the auto industry's biggest safety recall, but last week's announcement of more air bag inflator recalls suggests automakers could face fresh liabilities in the future. [Read](#)

[more at reuters.com.](#)

## Cop Unlocks Key To Identifying Criminal Aliens Using Stolen Identities

Police Officer James Scott of Saugus, Massachusetts, is an expert in impostor detection, and he has developed a training program for law enforcement officers that equips them with the knowledge and skills necessary to identify suspects who are in the country illegally. [Read more at lifezette.com.](#)

## GAO Urges Commercial Motor Agency To Re-Strategize Its IT Modernization

The Federal Motor Carrier Safety Administration needs to go back to the drawing board to better plan the modernization its IT systems, says a new report by the Government Accountability Office. [Read more at fedcoop.com.](#)

GM Gary,

Commercial Class code is optional and you can leave it as blank.

I am attaching a similar conversation between our BA team and Alaska in the past.

Let me know if you have any question.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!  
Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Ok, shall we move on to Driver H? Pointer has been added and ready for H1/2.

Thank you,  
Siri

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL, System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: SPEXS ID question

Mina,

Even for non-commercial class, we ask that you not populate the value with text that is not on the enumerated list. You can leave it empty or provide the status based on the license.

The reason we are asking this is because AMIE, being raw text, can accept any value that you provide. However, when States come onboard using Web Services, XML can only accept items that are on the pre-defined list. For example, in this case the XML enumerated list will contain (LIC, ELG, NON, RPD). If you send in 'ID', we will pass that to the Web Service SOI/NSOR, but since we cannot put the 'ID' value in this pre-defined list, the 'ID' will be transferred to the WS State in a separate conversion exception block. It will help the receiving States if we can minimize such conversion exceptions when a NIEM response is provided.

Thank You,  
Ashish

**Subject:** RE: SPEXS ID question

Sure Mina. Commercial Class is optional and you can leave it blank. We would rather have you leave the field empty rather than populate it with a value of "ID". We do not know if receiving States have validations on their end to accept only the enumerated values (LIC, ELG,..). Also, if the ID is associated with a CDLIS pointer then that status of "ID" could cause confusion.

Thank You,  
Ashish

**Subject:** RE: SPEXS ID question

Mina,

You do not have to send withdrawal information and DL Statuses when responding on an ID. We do ask that you zero out all the "numb" fields. These elements are not associated with the ID, but these count elements on the primary H messages (HB/HC/HD/HG) are used by the receiving State to determine if other messages (H2... H7) will be arriving. For example: A value of zero for Total Accidents Sent (DDTTAS) on the HB indicates that no Driver History Accidents (H4) message is expected. If the count fields are left empty, the receiving States may encounter an error. So, although not needed from a business perspective, we ask that these fields be zeroed to avoid any technical issues at the receiving State.

Thank You,  
Ashish

**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: SPEXS ID question

Hi Siri,

Thank you for the response. I'm sorry, I'm still not certain I'm clear.

Yes, our ID and License are two separate documents (which is why we have two separate pointers), although they share the same credential number. So my license and my id "DLN" are the same number.

This question is specifically related to how we should populate the various fields when the document type = '3'. It's not really state rules I need, it is what do the other states expect? The issue and expiration dates for the ID, I understand. However, I'm still not clear by what you mean by **you will send only the State ID related information on the response when the inquiry is on the State ID card.**

The other required fields for the 14/1 block on an HC are:

CLMF-NUMB-PERMIT  
CLMF-DESC-NON-CDL-STATUS  
CLMF-DESC-CDL-STATUS  
CLMF-INDC-DL-WDRAW-PEND  
CLMF-NUMB-DL-RESTR  
CLMF-NUMB-CONV-SENT  
CLMF-NUMB-CONV-RECORD  
CLMF-NUMB-ACC-SENT  
CLMF-NUMB-ACC-RECORD  
CLMF-NUMB-WDRAW-SENT  
CLMF-NUMB-WDRAW-RECORD

Since none of these apply to the ID cards, should we be zeroing out all the "numb" fields? Should we be using the license statuses even though they don't apply to the ID card? And should we indicate if there is a pending withdrawal (also not applicable to the ID card). I'm asking because we would rather not send license information on an ID inquiry or CSOR transaction – however, there are all these fields that are required.

**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: SPEXS ID question

Hi Mina,

The S2S Specifications document has been updated at the time to indicate the Issue and Expiration Dates on the 14/1 block to be Credential Issue and Expiration dates so they are no longer just Driver License Issue and expiration dates. Hence, if it is a State ID, you will send the Issue and Expiration Dates for that document issued. In case that is what you are currently sending on the 14/1 block for a State ID credential, it is correct. Comments are highlighted below for your questions

Now, since this driver also has a class D, we had been reporting the class D dates (highlighted). However, I can see where they actually want the issue/expiration of the ID. So that is making me question the rest of the data. — Are the Non Commercial Class D license and the State ID card issued as two different documents? If these are two individual documents, then you will send only the State ID related information on the response when the inquiry is on the State ID card. You will send the Non Commercial License Information when the Inquiry is on the Doc type = 1 (License). Having said that, I believe this depends on how the State has the two documents issued so it is dependent on the State rules.

1. Should we still be reporting commercial/non-commercial classes at all, or should we report this as a noncommercial class "ID"? (Same as above)
2. What license/cdl status should we use? If they have an expired license but unexpired ID, should the first status be LIC or ELG? This depends on how the State sending the information on State ID cards. We have seen some states send all the information on the record for a State ID as well.
3. What about permit counts and all the rest of the fields? Should we continue to fill them in based on license data, or leave them blank or zero them out -Same as above.

Please let me know of any questions.

Thank you,  
Siri.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL, System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Ok, shall we move on to Driver H? Pointer has been added and ready for H1/2.

Thank you,  
Siri

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

GM Gary,

Commercial Class code is optional and you can leave it as blank.

I am attaching a similar conversation between our BA team and Alaska in the past.

Let me know if you have any question.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPSS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

[Gary,](#)

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

[Gary,](#)

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Gary,

# F9 looks fine, except that on the H4 message, ACCIDENT LOCATOR REFERENCE is missing.

This is a similar issue like Driver E (# E13) , and you will be checking with Mina on this once she is back.

Please proceed with # F10.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

# F9 looks fine, except that on the H4 message, ACCIDENT LOCATOR REFERENCE is missing.

This is a similar issue like Driver E (# E13) , and you will be checking with Mina on this once she is back.

Please proceed with # F10.

Thanks,  
Asma

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = [111999999](#)
- Duplicate Driver Social Security Number (DDVSS8) = [111999999](#)

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

✱	DDVDOB	DRIVER DATE OF BIRTH	1	19661211
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPESS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

This email comes from an external source, so remember, Think Before You Click!

I'm thinking it should be a CDLIS = N but will need to confirm this with our team. Is it ok if we continue tomorrow with this? By that time, I'll have the answer.

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPES5) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a

CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?
